

KFORCE SOLUTION FOR BAD BREATH

The KForce Breath Kit is the first oral health care product in Australia that uses the natural power of probiotics to remedy bad breath. It has been designed to replace lost (healthy) bacteria in the mouth region, to maintain a healthy mouth and consistently fresh breath. The kit also comes with a bottle of concentrate and a bottle of activator. By activating the concentrate each time before use, you are

preparing the mouth to accept the KForce probiotic powdered mouth wash. The better prepared the mouth is, the better the probiotic bacteria will work to freshen breath.

Each KForce kit contains: a KForce Pre Rinse (Bottle A concentrate & Bottle B activator); KForce Powdered Rinse; 1 set of measures and spoons.

Kforce Breath Kit retails at \$49.95. For orders or information, call: 1300 653 335 or visit: www.breezecare.com.au
