

Who body

Hilary's smelly secret

Breathe easy

Ben Affleck had it while filming *Forces of Nature*, Hugh Grant had a touch of it at the 2002 Academy Awards and Hilary Swank experienced it while on a high-protein diet for *Million Dollar Baby*. The affliction? Chronic bad breath. "All that protein gave me the worst donkey breath," 31-year-old Swank said. Halitosis, which is caused by a change of bacteria in the mouth, can be treated with the KForce breath kit, developed by Dr Geoffrey Speiser from Australia's first Bad Breath Clinic. For more information, phone 1300 653 335 or visit www.breezecare.com.au.

Hilary Swank: don't get too close or I'll breathe on you ...
